

Tauqeer Ahmed

MERN Stack Software Engineer | Master's Degree in Computer Applications

Summary

Focused, Communicative, adaptive team player with a deep interest in Eco-friendly tech. I have a proven track record of creating and refining front and backend web applications, as well as native android applications.. Looking to bring my skills to a tech company that prioritizes healthy teams.

Open to working American and European hours for remote requirements.

Work Experience

MERN Stack Engineer at 100Devs, Los Angeles, CA. (Remote)

January 2022 — June 2023

- Improvised CRUD functionalities, worked with **ReactJS, NodeJS, and Restful APIs**, and got up to speed with new technologies on demand.
- Worked with clients live, on behalf of the company, ultimately making the company upwards of tens of thousands of dollars.
- Worked in a dedicated SCRUM team, and completed projects solo, in duos, and in large teams.

MERN Stack Engineer at Tau's Consulting, Hyderabad, India.

July 2021 — January 2022

- Created full-stack web applications and websites for national and International clients across small and medium-sized businesses, making clients upwards of \$50,000.
- Coded countless Ecommerce websites from scratch on React, WordPress, Wix, Shopify, **AWS** or basically any of the client's preferred technologies or CMS.
- Went the extra mile to optimize websites for Speed indices and SEO optimization so as to improve sales and success of the client's businesses.
- Improvised the layout & back-end of multiple E-commerce platforms. Some clients included:
Desilifter.pro
FontellaCosmetics.com
and Kattssochic.com (Depreciated as of May 2024. Swipe to see the project.)

JavaScript
React, React Native
NodeJS, Express
Flutter, Dart
SQL, NoSQL
Redux
MongoDB, Firebase
OOP
REST APIs
Auth0
JWT
Docker
GCP
Jest
React testing library
GraphQL
Git
Unit Testing
MVC
Go Lang

Recent Projects

1. [MauJo \(Cross-platform Web App\)](#) - Full stack website I designed for the MauJo Cafe and Hostel. The site uses the **Google Places API** to fetch reviews, and other APIs for handling Graphs and bookings. The site showcases my understanding of **server side rendering and API** consumption finely. Also my flair on Ui/UX design.
2. [Fresno Art Museum \(React Web App\)](#) – A website I designed for the Fresno Art Museum. The site is built on **React and Typescript**. It scores well on speed indices and metrics, showing my flair in SPAs and website optimization. The site adapts dynamically to screens of all sizes. Uses NodeJS, and MongoDB in the backend.
3. [GitHub Contributions](#) - A direct link to my GitHub. Has around **half a thousand contributions** since last year. Pick a green dot to see contributions. Also see pinned projects, those have links inside!

Other Projects: StarGazers Society APOD Web App with API integrations. Astro-screens App for a Partnered Twitch streamer with an audience averaging 100k viewers, Jill's Pot Casino Virtual Slot Machine, Los Angeles, and many more.
